DATA ANALYST / BUSINESS INTELLIGENCE ENGINEER

Data Architecture • ETL & API Ingestion • Systems Integration • Governance & Visualization

Systems-oriented Data Analyst and Business Intelligence Specialist with a strong background in mathematics, statistics, and full-lifecycle data product delivery. Experienced in building secure ETL/ELT pipelines, curating clean relational datasets, and designing bespoke reporting interfaces (Tableau, Power BI, HTML/JS web embeds) for public sector, human services, and enterprise clients. Proven track record in HMIS data management, data analysis and reporting, and Point-in-Time (PIT) count execution across King County. US Army Combat Medic veteran bringing strong leadership, rapid situational assessment, and a commitment to data security, efficiency, and code transferability.

TECHNICAL SKILLS

- **Data Engineering & ETL:** Python (Pandas, NumPy, Scikit-Learn), SQL (SOQL, Stored Procedures, Optimization), REST APIs, Google Apps Script (JavaScript), Regular Expressions (REGEX), Data Validation, Web Scraping
- **Business Intelligence & Front-End:** Tableau, Looker, Power BI, Custom Web Dashboards (GitHub Pages using HTML, CSS, JavaScript), Advanced Excel (Pivot Tables, A/B Testing)
- **Database & Systems Architecture:** Relational Database Design, Data Modeling, Metadata Management, Salesforce Integrations, Version Control (Git/GitHub), CI/CD Security (GitHub Secrets)
- **Methodology & Domains:** Data Governance, Public Sector Human Services Data, HMIS Administration, Coordinated Entry, Project Management, Technical Documentation, GIS/Spatial Mapping

PROFESSIONAL EXPERIENCE

Data Engineer / Analyst | King County Regional Homelessness Authority (KCRHA) | Greater Seattle Area
Jul 2025 – Oct 2026

- **Data Architecture & Pipeline Engineering:** Architect end-to-end data pipelines utilizing Python, SQL, and REST APIs to ingest, transform, and enrich disparate human services data into high-performance operational datasets.
- **Automated Data Cleansing:** Apply advanced validation scripts and REGEX transformation rules to process raw, unstructured tabular and vector data into audit-ready

datasets supporting regional reporting.
- **Custom Interface & Dashboard Development:** Build web-based reporting interfaces using HTML/CSS/JS deployed via GitHub Pages, alongside interactive Tableau and Power BI dashboards for leadership and community partners.
- **Data Governance & Security Controls:** Implement strict security and access protocols using GitHub Secrets, protecting sensitive PII and HIPAA-adjacent client data across all staging environments and public platforms.
- **Field Deployment & Project Analytics:** Coordinate operational analytics and field deployment for the 2026 King County Point-in-Time Count, developing custom volunteer management web applications and facilitating post-event process analysis focus groups.

Data Management Specialist | King County Regional Homelessness Authority (KCRHA) | Greater Seattle Area
Apr 2024 – Jul 2025

- **Data Modeling & Systems Integration:** Translated business questions into clean data extracts and queries, bridging raw HMIS database outputs with public-facing products and regional service databases.
- **Public Reporting & Analytics:** Authored analytical products for the inaugural KCRHA comprehensive PIT report and engineered pipeline feeds to power public-facing dashboards and mandatory reporting streams.
- **Ad-Hoc Querying & Compliance:** Executed complex database queries to fulfill critical data requests from elected officials, service providers, research partners, and public stakeholders.

Data Analyst & Consultant | Evergreen Data Architects | Greater Seattle Area
Dec 2023 – Present

- Consult with small businesses and non-profits to design and optimize data storage, ETL workflows, and reporting interfaces.
- Automate manual data entry processes through API integrations and Python scripts, improving data reliability and operational flow.

Data Consultant | Motive Search Inc. | Remote
Jul 2023 – Jan 2025

- Engineered automated data integrations connecting Applicant Tracking Systems (ATS) with Google Workspace using REST APIs, Google Apps Script, SQL, and Python.
- Designed data access infrastructure to enable seamless candidate pipeline analytics and client presentation workflows.

Team Lead (Data Analytics & Coding for Data) | Podium Education | Bellevue, WA (Remote)
May 2023 – Dec 2023

- Instructed and mentored students in advanced data analytics practices, including SQL querying, Python data mining (Pandas, Plotly, NumPy), EDA, data cleaning, and Tableau visualization.

Analyst | Parker Remick | Tacoma, WA
Aug 2021 – Feb 2023

- Constructed Salesforce integrations using the Salesforce Connector and SOQL queries to feed raw data into Google Workspace analytics tools.
- Developed custom web scraping and data aggregation tools in Python alongside interactive dashboard environments for leadership decision-making.

MILITARY SERVICE

Combat Medic / Medical Sergeant | U.S. Army | Various Locations / Iraq
May 2005 – Mar 2016

- **Operational Leadership:** Served as Section Leader and interim Platoon Sergeant leading up to 28 personnel in high-stakes environments; deployed on two combat tours to Iraq in support of Operations Iraqi Freedom and New Dawn.
- **Mission Planning & Logistics:** Managed operational logistics, threat analysis, and medical support planning; directed continuing education and certification courses across company-level units.
- **Healthcare System Education:** Managed externships and clinical rotations for educational institutions across the PNW for the Madigan Army Medical Center (MAMC); Provided training and training support for MAMC staff (BLS, Onboarding, HIPAA, etc.).

EDUCATION & CERTIFICATIONS

- **Professional Certificate in Data Science** | University of Washington (*2023*)
- **Bachelor of Science in Mathematics** (Minor in Statistics) | Pacific Lutheran University (*2021*)
  - *Awards & Leadership:* Student Life Leadership Award for Innovation; PLU Natural Sciences Department

Certifications & Credentials:

- *Data Science Professional Certificate* – University of Washington
- *Math Fundamentals for Data Science & Machine Learning* – Anaconda
- *Statistics & Hypothesis Testing / Probability Fundamentals / Linear Algebra* – Anaconda
- *SQL Certification* – HackerRank
